Horse & Colt

Premium Hay & Pasture Mix

Mixes provide genetic diversity in a field, along with extending high-quality grazing or cutting periods and extending the productivity of the field for more months of the year. Genetic diversity often prevents a single disease or weather condition from adversely affecting the entire stand of forage. Additionally, in a mix, each species matures at different times, preventing the field from quickly over-maturing at the same time and rapidly losing forage quality. Horse & Colt is a high-performing mix of grass species for horses of all types, and the mix can be used for hay or pasture. The four species of grasses in Horse & Colt are popular, proven species for the northern tier of the country. Characteristics of Horse & Colt include:

- High-quality mix of nutritious, preferred horse forages.
- Tolerates heavy grazing and traffic.
- Improved varieties provide excellent yields, high forage quality, and excellent disease resistance.
- Wide grazing or harvesting window while stand has a high forage quality.

Mix Formulation:
50% Delay Orchardgrass (medium-late orchardgrass product)
25% Climax Timothy
15% Spring Green Festulolium
10% Ginger Kentucky Bluegrass

Persistence
Good

Drought Tolerance
Fair-Good

Winter Hardiness
Good

Palatability
Good

Yield Potential
Good

Grazing Tolerance
Excellent

Planting Rate
New Pasture or Field: 25-30 lbs/acre
Overseeding: 15-20 lbs/acre

Suitable Soil Types
