**Triple Jump**

**Premium Hay & Pasture Mix**

Mixes provide genetic diversity in a field, along with extending high-quality grazing or cutting periods and extending the productivity of the field for more months of the year. Genetic diversity often prevents a single disease or weather condition from adversely affecting the entire stand of forage. Additionally, in a mix, each species matures at different times, preventing the field from quickly over-maturing at the same time and rapidly losing forage quality. Triple Jump is a high-performing mix of grass and alfalfa species for horses of all types, and the mix can be used for hay or pasture. The five species of forages in Triple Jump are popular, proven species for the northern tier of the country. Characteristics of Triple Jump include:

- High-quality mix of nutritious, preferred horse forages, including pest-tolerant alfalfa.
- Tolerates heavy grazing and traffic.
- Improved varieties provide good yields, high forage quality, and excellent disease resistance.
- Wide grazing or harvesting window while stand has a high forage quality.

Mix Formulation:
- 35% Premium Tetraploid Perennial Ryegrass
- 20% Climax Timothy
- 20% Grazing Tolerant Alfalfa
- 15% Ginger Kentucky Bluegrass
- 10% Spring Green Festulolium

---

**Persistence**
- Good

**Drought Tolerance**
- Fair

**Winter Hardiness**
- Fair-Good

**Palatability**
- Good-Excellent

**Yield Potential**
- Good

**Grazing Tolerance**
- Good-Excellent

**Planting Rate**
- New Pasture or Field: 25-30 lbs/acre
- Overseeding: 15-20 lbs/acre

**Suitable Soil Types**
- Light
- Med
- Heavy

**Planting Zones**
Best in early spring or early fall when weather is cooler and moisture more reliable.
